Art Unit: 3751

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on March 19, 2007 has been entered.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 4-7, 9, 26-31 and 33-37 are rejected under 35 U.S.C. 102(b) as being anticipated by Widman.

Art Unit: 3751

The Widman reference discloses a sink comprising: a top surface 22 including a depression 21; a front surface 23 including a hole 65 and a recess 34; a panel 25 including a decoration 26; a bolt 36; and a counter assembly 27,29, as claimed. Re claim 6, the panel may be constructed of a "different" metal (pg. 2 lns. 21-23). The initial statement of intended use (farm), and all other functional implications related thereto (kitchen), have been considered but do not appear to impose any patentably distinguishing structure over that disclosed by Widman.

4. Claims 6, 30 and 36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Widman.

The choice of material would appear an obvious choice to be made.

5. Applicant's arguments with respect to claims 26 and 33 at pages 6-8 of the response filed March 19, 2007 have been considered but are moot in view of the new ground(s) of rejection.

6. Applicant is referred to MPEP 714.02 and 608.01(o) in responding to this Office action.
